The music business had to be a fundamental shift, Crikey progressed
undeviatingly their way, to further refine their pressure and
atmospheric, modern sound - this ranges from sweet to bitter,
from one extreme to the other.

Crikey use a wide variety of influences from the various genres of
metal. A punchy rhythm section, the symbiosis of demanding guitar and
violin melodies. The constant interplay of deep death metal growls and
shoutings in combination with the catchy harmonies and the groovy
breaks provide for a voltage arc of intensity hardly second to none.
